## THE NATIONAL THEATER.

THE NATIONAL THEATER.

To the France of The N. V. Tribone.

Sin: In your journal of to day I noticed a communication signed "Reform," in which the writer complains of being ejected from the dress circle of my theater, and asked to take a seat in the second tier. I would briefly state that since the triduction of "Unels Four's "C. bin," my cross circle is almost wholly sourced by certificates during the day by gentlemen bringing ladies, consequently gettlemen coming eithout cardinates of reference was used there are no second tier, which is the same price of admission as the dress circle. I presente if "Reform" had understood this marker be would not have complained. On Monday next I shall make an alteration in the lower part of the boass, which will epable me to accommend to several hundred core pursues. Promistor National Thesian.

THE TRIPARTITE.

aba and the United States-Reply to Mr. Everett's Letter. LORD JOHN RUSSELL TO MR. CRAMPTON.

PATENT OFFICE, Feb. 16, 1853.

Sir: Lord Malmesbury received, just before leaving bee the note addressed to you by Mr. Everett, and left if the consideration of his successor. The absence from London of the Ambassador of France a litherto prevented that communication between the officerum-nis which the circumstances of the proposal

is hitherto prevented that communication between the confeverments which the circumstances of the proposal ade jointly required.

I have now to inform you of the view which Heripetty's Government take of Mr. Everett's reply to our certure.

It is doubtless perfectly within the competence of the merican Government to reject the proposal that was see by Lord Maluceabury and M. Tured, in reference to that. Each Government will remain as free as it was bere to take that course which its sense of duty, and a result of the interests of its people, may presente.

I should have astistice my obligations as Sevetary of take by this obvious remark, had not Mr. Everett entered large into arguments which the suspice asture of the unstitude for his proposal to that of the United States, were my aware of the growth of power and entension of territry which have marked the progress of the United States, were my aware of the growth of power and entension of territry which have marked the progress of the United States, were not seen to the Content of the Content of the Content of the content of the American war.

It occurs to Her Majesty's Government, therefore, to ask or what propose are these segments fully avowed, but they require the bereninded of the svents of the content that the purpose, not fully avowed, but they require the propose of a doctors.

nch preparation, and urged with so much ability. It would appear that the purp see, not fully avowed, but rely concealed it to produce the admission of a doctrons at the United States have an interest in flubs, to which real Britain and France cannot pretend. In orderto meet is pretends in it is necessary to set furth the character of a two powers sho made the offer in question, and the ture of that offer. Mr. Everett declares, in the outset of a cispatch, that "the United States would not see with indifference the island of Cuba fall into the possession of any other European Government than Spain," Act.

The tupo powers most likely to possess themselves of Cu, and most formidable to the United States, are Great citatin and France.

s, and most frames.

Great Britain is in possession, by treaty, of the island of frinciac, which, in the last century, was a client of Spain rance was in possession at the commencement of this entury of Lumisiana, by voluntary cession from Spain.

ENGLISH AGRICULTURE.

From The London Times, July II.

Mr. Mechi held his annual gath ring of actioniturists yesteroly, and it went off as pieseably as ever. On no former occasion has the attendance been so numerous, the crop in better order, or the spirits and volubility of the less mare high. He was everywhere, had a warm welled not on the give to every bedy, and explanations of processes, reproaches against bad farming, hopeful anticipation of its future and disquilitions and statistics on the experiences of Tiptree felt from hum as thick as the 1-avest from a forest in an union. Whatever may be said or thought about the practical character may be said or thought about the practical character may be said or thought about the practical character. In no other o untry count the spectocle be presented of a prosperous and enterprising trades had agrentized by an assen blegato see and criticize what he has achieved in in proved cultivation. He gives his annual lesson in the next ferieses and nocompromising manner, yet awared with a good homor which is quite unextinguishable, and such an amount of good cheer before which the crutilest prejudices and the kennest of the lare, the larve quantity of none fest stock, the great tark with its accumiation of liquedest manure, be iron pipes pero sating every field, and carrying chemity and in an easily digested form the food of plans, the whole land theroughly orained, cleanly cultivated, and covered with mat luxurisant cropse these and many other agriculturists near the metro-poles. Even, however, when lighter is rivaled, Mr. Mechi and his annual meeting, we hope, will remain. Having surresonated a good deal of ridicule, and the progress of events having shown that, in the math, he was soraing in the right direction, the public are self disposed to make him their agricultural favorite. When improvement was considered a forlier hope he steed in the breach. He lectured, he wrote, he taught by practice as well as procept,—he may even be said to have held "it the cause. Now th

in the details of which he has carried out many variable improvements.

The clover is a second crop, and the rye grass a third, and both are exceedingly hardrant. It may, therefore, he required as the objet feature of the present gathering at Tystree that it furnishes, within easy reason of the metropolis, a remarkable confirmation of the large results which have been already obtained in Scotland from liquestying the magnitude of the farm, conveying it intrough from pages to

FRIDAY, AGGINT 28, 1983.

The proposed service control with the property of th

as a consense in the country to set the ball family in motion, but the time will come—must come, when this business shall receive an impulse which will whiten our waste lands with the waving plannes of the sugar cane.

Coyers—The raising of office in favorable locations, for new need in the Valley of Hamalet on Kanai, and the directs of Kena and Hile on Hawaii, is in doubtedly a profit at le bushess, and evid-uity declines to advance. These cier, has taken no measures to introduce new seed from other office growing countries; for it is generally adoutted by the best judges that the Kona ouffeed flawaii is not stripassed by any in the world. However, there is lit the countries have ledge, and consequently the Society has sent for the most approved treatises on its culture, which are expected to arrive in a few mouths.

Wheat Core, Oats—A strong impulse has been given to the raising of grain since our test meeting by the night

A correspondent of The Newark Daily Eagle has the following palpable hit:

SHARON, M. J., Aug. 28, MSD.

The yourg ladies composing the three savanced classes in Mr. and Mrs. Wilthank's "Day Bearding and Finishing "Seminary" in this place, destring the light which each one feels blazing within her should be set upon a candisatiok, have determined to communicate their inspirations to the public through the medium of the press.

It is now an established rule in the Recublic of Letters, that every lady eriter who hopes to attract attention, or receive even fair criticism, must assume a signature softly senimental, and more or less radient of the forest or flowers bed. Without he success of "Fanny Forester," "Fanny Fore," "Grace Greenwood," Helen Heath," Lottic Linwood," Minnie Mytle," and others. The young ladies, therefore, who o impose the advanced classes in this seminary have each adopted a name bearing some relation to woods and fields, floriculture, borticulture, or agriculture, Whenever you receive a communication with any one of these names appended, you will know whence it comes, and give it proper insertion. One of the undersigned may send, at an early day, her composition on the "Spirit of the Ape." which has been much admired. Faithfully cours, Amie America, Lune loy, Jensie Jamper, Reastoe Ferrivaishte, Jensie Jamper, Rettle Bismoon, Kate Kanil-Bower, Selies Breis, Lune Louder, Spiric Snow-drop, Carte Corrent-bush, Moth Manure, Soph Snay-drops, Gertroe Greenboase, Pattle Paiery, Virgnia Verbana, Christine Crymitoenum.

Another "Conventees" Affairs.—A man representing the chart. A control Conventees of the composition of the control o

to the warring of or fine in favorable locations, for the mainty of Hamilton & davidy a profit of the barring of the control o
